Core Elective Pool (1 ECTS)*	Offer Frequency
GCP-Advanced course (Module 3) and Journal Club**	each semester
Optional Modules (Selection, 2-3 ECTS)	Offer Frequency
Health Economics	every spring semester
Statistische Modelle mit R	every spring semester
ZNZ Introductory Course Neuroscience I/II Personalized Medicine	every fall / spring semester
Winning the Publication Game	every fall semester
Transferable Skills Kurse des Graduate Campus	every semester
Applied Implementation Science in Health Care	every fall semester

At least 12 ECTS must be earned during the doctoral program. For this purpose, you will attend compulsory modules (total 9 ECTS) and elective modules (minimum 3 ECTS).

Attendance of the PhD seminar is mandatory for the entire duration of the doctorate.

** If the certificate GCP 3 (or equivalent) has already been acquired, the module does not have to be completed again and can be replaced by an elective module. To receive 1 ECTS, both GCP 3 and a Journal Club must be taken.

** Two Journal Clubs are offered: The Joint Journal Club with Karolinska Institutet in Stockholm (focusing on the health sector) and the Journal Club of the Graduate Campus of UZH. For registration contact the program coordinator. If the two Journal Clubs are combined, 1 ECTS can be credited.

Detailed information on the individual courses can be found in the online course catalog of the UZH. There is no sequence to follow when completing the modules. Prior knowledge and requirements are listed in the course catalog.
