

Call for research grants

The SWISS FOUNDATION FOR RESEARCH ON MUSCLE DISEASES calls for grant applications.

The aim of the foundation is to support basic, translational, and clinical biomedical research related to **muscle and neuromuscular diseases** in Swiss Institutions, including projects aiming at improving diagnosis of these diseases.

Applications are particularly encouraged from young researchers who aim at establishing their own research on neuromuscular diseases. Such FSRMM grants, which provide support for up to three years, are thought to prepare the young researchers for junior professorships.

Deadline for the application is August 31st 2026.
